

I MADE PANDE ARI WIJAYA

Jakarta, Indonesia | ari.wijaya.dev@gmail.com | +62 82229005439 | [linkedin.com/in/ariwijaya82](https://www.linkedin.com/in/ariwijaya82) | <https://ariwijaya-dev.github.io>

SUMMARY

Software Engineer specializing in Go, Python, and TypeScript with a deep foundation in frontend excellence via Next.js. Adept at integrating AI/ML workflows into production-ready environments. Skilled in architecting robust backends and managing containerized deployments through Docker, ensuring seamless delivery of complex features across the full application lifecycle.

TECHNICAL SKILLS

- **Programming Language:** Go, Python, TypeScript/JavaScript, C++
- **Backend & Cloud:** Gin, FastAPI, Node.js, PostgreSQL, MongoDB, Redis, Docker, Kubernetes.
- **Frontend:** React.js, Next.js, Tailwind CSS, Responsive Design.
- **Specialized:** AI/ML Integration, AI Agent.

EXPERIENCE

Peepl Jakarta, Indonesia
Fullstack Engineer May 2024 – current

- Architected and executed the migration of a legacy monolithic Laravel platform to a Service-Oriented Architecture (SOA), utilizing React, Golang, and Python to improve system modularity and maintainability.
- Scaled platform concurrency by decoupling core services, enabling the system to handle high-volume peak-time testing for enterprise clients without performance degradation.
- Engineered an AI-driven candidate summarization engine using Python, reducing the time recruiters spend on manual profile reviews by providing automated, data-backed insights.
- Developed an automated AI scoring system for interview-style assessments, leveraging AI to standardize evaluation criteria and increase the objectivity of candidate results.
- Optimized backend performance by selecting the optimal language for specific services (Golang for high-concurrency tasks, Laravel for rapid feature iteration, and Python for AI/ML integration).
- Designed and implemented responsive frontend interfaces using React, improving the end-user experience for both candidates taking tests and HR administrators analyzing data.

Samsung R&D Indonesia (SRIN) Jakarta, Indonesia
Cloud Frontend Engineer July 2022 – May 2023

- Contributed to a CMS project aimed at managing AI datasets efficiently.
- Focused primarily on frontend development, utilizing React.js for building responsive user interfaces.
- Collaborated with the backend team to integrate frontend components with backend APIs.
- Participated in code reviews, debugging, and testing activities to ensure the reliability and stability of the CMS.

Humanoid Robotic Team ITS (ICHIRO) Surabaya, Indonesia
Software Programmer January 2018 – December 2020

- Programmed humanoid robots for international competitions, focusing on walking algorithms and vision systems.
- Implemented color classification and pattern recognition for real-time ball and field detection in dynamic environments.
- Utilized simulation environments to stress-test algorithms before hardware deployment.

EDUCATION

Sepuluh Nopember Institute of Technology (ITS)

Bachelor of Engineering, Electrical Engineering Department. **GPA:** 3.42 [[transcript](#)]

Surabaya, Indonesia

Aug 2017 – Dec 2023

Thesis: Path Planning and Navigation Strategies for Humanoid Robot Soccer using A* Algorithm and Bezier Curves

AWARDS & ACHIEVEMENTS

- 2nd Place in Hurocup Adult All Round FIRA 2019 Changwon, Korea [[credential](#)]
- First Place TeenSize Technical Challenge RoboCup 2019 Sydney, Australia [[credential](#)]
- Third Place KidSize Technical Challenge RoboCup 2019 Sydney, Australia [[credential](#)]
- Third Place TeenSize Soccer Competition RoboCup 2019 Sydney, Australia [[credential](#)]
- Winning the Champion prize in the Humanoid Robot Competition SRG Singapore [[credential](#)]
